I don't keep flies long enough to worry about organizing them. I have them scattered throughout the rocks and trees :) But what I do have is kept in a cabelas xl leaf box I got for 14 bucks online. Maybe if I got ahead on flies I'd keep them in one big box. Maybe a wall mounted case with a glass door in the living room? I would take up less room than a gun cabet. I'm sure the Mrs would have something to say about that.
