Is it just me or does it appear as though this thread has nothing to do with the OP's needs? I mean I've hijacked my share of threads before but this baby has done jumped tracks!

Anyway, Echo Carbon is closing out last year's model's and I saw their 6'6" 3wt rod on sale for \$127.99.

Usually \$170 or \$180. Of course, if you have a friend who is cleaning out his stock, you can get it for much less.

Good luck.
