I am a firm believer that when it comes to rainwear you get what you pay for. I work outside everyday in all kinds of weather. Goretex is the best way to go. You could look on ebay or the web for some discounted goretex jackets. I purchased a simms guide jacket last year and love it. I love to wear it in the early spring to fish as well just to help keep warm. You could even look at some goretex golf jackets. They might be cheaper and lighter . Check out Eastern Mountain Sports as well or any outdoor hiking/camping shop.
