Will/could we ever see brookies like that again? Did we ever have brookies like that in PA?

I doubt we'll see them again, but we certainly did have natives like that many years ago. Pick up a copy of The Vanishing Trout and you'll read stories of many large natives being caught in Pa before the logging and the coal extraction.

I'm sure brookies as big as the one in that pic were still pretty rare though, that's a monster!
