I have a stash of Gudebrod thread in 3/0, 6/0 and 8/0 in quite a few different colors. It's my favorite thread. I was sorry to see them quit making it but I have enough to last a while. I have used Uni, Danville and UTC and they all seem to work fine. IMO Uni is the closest to Gudebrod in how it handles and the way it looks. I will more than likely switch to UNI when the time comes.
