In the salt I have a long brimmed baseball style hat with a "flap" of material that covers my neck and ears. More coverage less for the dermatologist to freeze.

Trout fishing, a subdued color baseball cap. Winter or cold weather it's a cap that is insulated and has a flap to cover my ears and a bit of the neck. Best part is that I won it in a contest,best "free" thing I have. GG

Anyone add a bandanna to the hat for a sweat band?
