I'm with Fishidiot... use what you have. My first heavier set up was an 8wt Sci Angler combo I bought at Wally World in Kitty Hawk. It came with a graphite large arbor reel, line, leader, and a few saltwater flies. The combo was nothing to write home about but it did the job for many years and held up better than expected. I now use a Scott S3S 8wt and 10wt and Ross BG Canyons.
