Is this for the Fish PA GPS guide on the app store that is \$24.99? If it is and may I put in a suggestion for this. I have been on the fence about buying this app for a few months as the expense of it is pretty high compared to other apps. I don't want to pay \$25 for something that you cant try before you buy it. Maybe add a 3 day trial to the app so we can try this before paying the full fee?

If it is worth it I would gladly pay for this app.
