Unfortunately, the way apps are distributed, there is really no way to offer a short trial as you suggest. I wish I could do something like that but it's just not feasible.

You are correct that this is the Fish PA - GPS Guide.

The unfortunate thing about apps is that all these free and low cost apps make it difficult for a guy like me. You probably wouldn't flinch at paying the same price for a good book. You've probably got a DeLorme atlas at \$19.95 and a Higbee map as well. For me, there's more work in this than I would have invested writing a book. In addition, I think the new mapping will make Delorme unnecessary by giving you 7.5 minute topo's.

Brad

The app will put you on fish and allow you to explore more new streams than you can fish in a lifetime. Will it make you a better flyfisher?

Only experience can do that.
