My fave is a wool Lite Felt crusher by Renegade Headwear made in USA. It's a wide brim cowboy style and is (was?) water repellent. I bought it years ago at Wally Eagle's store and it's still going strong. The best feature is the chin strap. When the wind kicks up, tighten up the chin strap. Only had to replace the slide on the chin strap once so far but that just takes a small bit of leather scrap. Tight lines,

Dave
