Fish, has there ever been a "Toothy Jam"?? just wondering??

Nope. We've only had a couple warm water jams that were more or less official. I did point out some muskie spots on one of them but the main target was smallies. Some muskies were seen but none caught. I'd enjoy a toothy jam but I'm not sure how many folks would show up. Might be worth a try - no need to make it a big thing.
