Great; seeing as it is being consistently updated and cared for, I purchased last night!

My quick opinion (and my bias as well) is that it needs a graphical overhaul. I would've bought sooner if it didn't look like a bunch of text screens in the preview. As it is, the information is wonderful but the delivery is a little dry. Love what is there so far, however!

In future versions, I would be so very happy if I could input specific coordinates of my own holes and favorite spots to park/fish. Let's say I find said hole - I'd like to pull the phone out, take a picture, and have that information for me if I need/want to come back to the place.
