yes on a wading staff on penns, pretty much the only stream I ever use one on. Super slippery rocks, deep hidden holes, and the fact that the best fishing occurs right at dusk and you usually have to wade out in the dark, a staff really helps you feel your way back to shore.

studded shoes are another big help.

those levels mentioned above are good guidelines, but I use an easier gauge, if it's raging and looks nasty, I'm not gonna fish it unless the drakes are coming off!
