Those are the exact flies I was looking for. I ordered the osteritch hearl, the nymph legs, and mono eyes (i dont feel like burning myself ;) ) what is the feather that you apply glue to, and what material gets folded back over for the head? want to be sure i have all i need. if you can give me a rough recipe that would be great. i ordered the chewee skin as well. in the demonstration he twists the osteritch around this and then wraps for durability. i ordered olive and brown for osteritch, any other colors you can think of.

Thanks for the input!
