Mike , if you are going in off rt 160 there is a gate that is locked , which makes it walk in for much of the year and it's quite a hike. After they stock it they open the gate and you can drive to within about a quartermile of the lower end of the ffo section. It can also be reached from the dirt road at the "Iron Bridge" downstream , and it's also quite a hike , that gate is always locked but it's a nice flat mountain bike rideGOOD LUCK
