Haha! Welcome to opening the can of worms, brother! Honestly, I could survive in NCPA with the three dries you listed. I can survive in SE PA w/ those three flies, especially on native and wild streams.

That being said, I love being in NCPA during hatches. Some of my favorite memories over the years have been catching hatches on those NCPA streams. Ones that stick out to me the most would be the sulphurs, green drakes, and march browns. If I lived in NCPA and fished there most of the time, I'd try to at least catch those hatches.
