What rod wt are you using? The other day I was using my 5/6 Wt and I kept getting smacked in the back with a size 8 (I think) nymph. I know alot has to do with leader/tippet sizes as well. I custom make my own out of leftover lines. Normally I go with a 10lb 3' to 6lb 5' and last but not least a 2 or 4lb 3' before the nymph. Maybe I should cut out one of the lengths and downsize the tippet abit? Possibly go from the 10lb to the 6lb and then the nymph?

sounds more like your casting than leader make up..dropping your wrist on back cast and tilting rod tip towards you will do that.
