Hendricksons, quill gordons, blue quills, green caddis. tan caddis, green drake, coffin fly, rusty spinner, isonychia, baetis, cinnamon caddis, the hatches pretty follow that order, but vary from time to time. For attractor patterns royal wulf, stimulator, adams. Most of the time in NC PA you will not be fishing hatches, but use hatch charts to tell you what should be hatching and use the appropriate fly and you will catch plenty of fish, this is my method for fishing NC PA, and it works.
