Thanks everyone, and fish idiot thanks for the size recommendations, as I told him 14 in caddis and 18 in BWO, and thanks for the list Chaz i wrote it down. Squatch, those are basically the only dry flies i carry in a couple different sizes in case the fish are spooked by an indicator. But funny you mention it, I was able to hit a sulphur hatch last year one day on the EBCR DALO and came back the next day to not see a fly, just some cream cahills here and there. After that I did get some sulphur dry flies because they wouldnt even look at anything else.
