I'd advise keeping his fly selection simple...a parachute adams will cover a multitude of dark-bodied mayfly hatches and makes for a good all-around attractor fly...sizes #12-#18, and few #20s will do.

Tan Caddis are common enough to carry in your box whenever you fish. I liked to carry them sizes #14-#18

You can also add some sulfurs (Emerger/Dun/Spinner) when they start, but that's still a few months off - he can buy them then...I carried them in sizes #14-#18.
