In regard to the Comparadun:

Try to use the hook as a measuring tool. Finished wing length should be about 3/4 the length of the shank. Also tie the wing in a little farther back.

Finally, try bucktail, or coastal deer hair for the tail to control the wild flair. Also shorten the tail some.

Kev

Kev, thanks for the input. My measuring surely needs more work! I measure and think I have it, then look and it's "Awww, Crap!"
