how many fish can you catch?

everyone has had poor days, good days, and excellent days in regards to number of trout landed whether stockers or wild, good weather or bad, or time of year.

i know there are other variables most importantly number of hours fished.

if you were telling the story of your day afield and you smoked em/tore it up/slayed em...etc how many fish would that be for you?

some guys might think 12 is an awesome day and others might think it was just ok meaning the day before or the next day they caught 40.

we all go fishing to catch them so let's be fisherman and brag about how many we land and how long you fished.

for example if i say i smoked em i would have fished from dawn to dark and hit 30. again either stockies or wild...gotta be at the right place at the right time and fish that 20% of the water where they are right? so this does not happen for me often, i wish i could catch 20 and only fish a couple of hours!

let's hear your numbers...
