if a ff only or delayed harvest section what is the difference between a bead and small glo bug?

one is leagal and one is not...correct. am i talking/typing to myself?

but really, beads are not bait. i really don't fish them much but think that the rules should omit molded eggs.

i learned this after my buddy asked me what i was catching em on...i answered trout beads, he said walk back to the bank and read the sign...oops. gotta leave the beads in the truck when going to the delayed harvest sections.
