a longish two weight like that is great fun fishing machine for small trout in small streams with dry flies up to about a 14. not versatile for big fish, flies, streams, or wind. just a question of the fishing you will do.

maybe do some yard casting with a 30 ft tape measure and the plastic still on the grip, return it if you dont like it?

it might feel ok with even a 4 w line, but i'd put a 3 ona rod like that.
