One thing I do with all of my trucks, is install a wooden shelf - about 20 inches wide - on the bed/cap rails right behind the front window of the cap front window. It's pretty handy for getting gear out of the way when I need the bed room for other purposes. And it would also be a pretty handy place to mount rod hooks easily.

When I had a cap, I did the same thing with the shelf.

You may be able to come up with something like the Rod loft pro.  
It can be mounted to the window frames.
