i was just curious when reading someone saying they hammered em if they meant 15 or 80.

I know you were, but there's not a straightforward answer.

I don't know of any situations where 80 is a bad day. But there are situations where it's merely a good day, and 15 would be a terrible day.

And there are other situations where 80 is a pipe dream to laugh at. 5 might be considered a good day, and 15 is really hammering them.

And everything in between. There are even situations where if I get 2 or 3 I would say I did well.
