I am curious if they have a schedule, so I know what times to avoid spring and fishing creek. The last thing I want to do is bungle somebodys chance at doing great at this event by fishing through their beat an hour before they are supposed to fish it... I will be working most of that weekend, so I can't commit to helping or I would. I figure the next best thing is making sure I am not ruining somebodys day. I know I wouldn't want to fish a beat that somebody just fished...

Thank you!
