Yellow Breeches Nymphing (advice?)

Hi Gents & Mesdames,

Last trip to the YB, i enjoyed casting to the occasional rising fish and caught a nice brown on a #24 midge...while fishing I spooked some larger fish on the bottom, so next trip I plan to spend some time Nymphing.

i have not yet fished the run or below the Dam. Are these good targets for Nymphing?

I'm set up w/ a 9'5wt. Can a veteran recommend what I might try for leader/tippet/and flies? Any advice as to technique? I have been working both on indicator fishing w/ a smallish thingamabob, but also trying to develop some tight line technique...

Should I expect that in early March the trout remain sluggish?

Any tips, especially specific to the YB would be very much appreciated!

Thanks in advance,
S.T
