The three you mention are a good start. Generally, insects tend to be a bit larger upstate. I'd add the following (or something like this):

- Blue Winged Olives, size #20
- Sulpher, #14
- Elk hair caddis (cream and gray) #16
- Midge (any pattern - black or cream #22)
- Rusty Spinner #14
- Stimulator #10
- Ant, black #14
- Ant, cinnamon #20
- Foam Beetle, black #14

great list !

i wish i'd had that a few months back when i was adding to my collection of dry flies.
