I am 32 yrs old and have been fishing up north since I was 8 yrs old get a clue fellas and learn to fish there is no reason to be in the heavy deep holes when the river is flowing at 1200 fish the current breaks and the soft water close to the shore learn to use your equipment and a drag free drift and you will have no problem finding the bottom..... I have easily over 50 days a year chasing steel out of the great lakes and the west coast
