I have been throwing around the idea now for over a year of tying my own flies. I'm sure that there is a lot of satisfaction of having a fish take your pattern. I would like to start tying flies, but I need some suggestions. I realize that probably the best thing to do would be to take a class. The problem is that my local fly shop offers them only on a night that I wouldn't be able to attend. So what do you suggest? Should I buy books or are there videos available. Are there certain products (materials, tools, etc) that I should buy? What I don't want to do is make an investment in something that I can't use because I lack the knowledge.
