Enjoyed a nice day out with a few folks on the site on Big Spring Creek in the Catch & Release Fly Fishing Only section. It was supposed to be a nice sunny Feb day only to have it be a little cold and closing out the day with snow flurries. The temps were in the upper 30's with a mix of sun and clouds. Water was in the 50's and very clear.

We had hoped for some BWO' and a couple of risers seen during the day, but nothing on the surface really worth talking about.

Best luck was with cress bugs then swinging sculpins along the undercut areas and along the elodea.

Interestingly we found a few brookies still spawning up in the ditch.
