Yeah, there's been rumors that a felt ban is coming. Nothing official sounding, though.

That said, we DO have streams with Didymo and are trying to prevent it's spread to other streams which do not (yet) have it. Make a habit of cleaning your gear properly. Not just the boots, but all gear.

Both branches of the Delaware, as well as the main stem have confirmed Didymo. Also, the Youghiogheny River. Nearby "destination waters" in other states with confirmed Didymo include the Battenkill in NY and the Gunpowder in Maryland. I'm sure there's others.
