I have used the Ross Flystick in the past and I recently picked up the Bass II rod from Sage. I like the Sage rod and the short length comes in handy, especially from the yak. I picked up the Smallmouth model and the line's grain weight puts it right between 10-11wt standard so it can throw the heaviest and most wind resistant flies.

I prefer to use a 9ft 8wt for most of my smallmouth fishing.

There are some locations where I wade very deep and a 10 or 11ft works better.
