Well if PFBC doesn't consider streams under 4 meters wide let's take off Cold Run. I'd bet if you went to the Northkill you'd find it's Class A now both in Sand Spring Run and the Northkill.

I tend to agree with Pat on the streams that should be taken off, but I also have to wonder if PFBC were in part financed from the general fund if reductions in stocking would ever happen?

Also I think the Big freestone streams should have hundreds of thousands of fish stocked from Sept to about mid-May, they all attract a lot of anglers and they attract them all year.
