Talking with some WCO's recently and the removal of stocked fish in better than marginal waters is being considered. I know of two or three that have section that would hold there own. However the dollar will win at least part of the fight as to who gets and who does not get there fish. At least this is being considered by the decision makers. Most anglers would not catch trout if they had to rely on wild fish. This would hurt license sales and more cut back. It would be a victory for quality trout in Pa but not for Pa fish and Boat.
