Does anyone have any suggestions for a good pair of hip boots. I wear them alot and can not get one season before the leak. Usually the rubber starts to crack and one patch leads to two and so on. My best results has been when they get a new shipment in in the spring. Perhaps do to fresh rubber longer lasting. I am willing to pay whatever it takes to get a few years out of a pair of new boots. My breathable chest waders are never a problem.If this has been covered recently sorry I am new to the site.
