Fished from 7AM until noon with two friends. Weather started out cloudy then out came the sun and the fish started hitting. I ended up with 16 stocked rainbows and two wild browns. Pic of largest bow attached, about 18'. my buddies had similar luck. Had success with egg patterns, princes, beadhead caddis and pheasant tails . Changing flies often was needed. The fish are not spread out well, we caught most of our fish at just two locations.
