Anyone thinking of fishing the Tully Saturday and/or Sunday? I'll be heading up tomorrow for sure and maybe Sunday too if I'm successful tomorrow. I typically park at Rebers Bridge and go walk upstream about 200 yards and fish back to the bridge and later will be going up to where the USGS gaging station is located. I'd bet there will be fish up tomorrow. I was there two weeks ago and it was bitter cold and I saw a couple rising fish.
