WB provided some good advice. BTW, I didn't mention fly fishing the lakes.... just fishing them in general. It is mostly bait or trolling with plugs if you want to row yourself to death. In order to bring a watercraft on the lake...be prepared for a nightmare. The boat has to go through wash / decontaminate stations and you need some type of permit. Once the boat leaves the lake, it all has to be done again if you come back a different day. Rental boats would be huge and I wasn't aware that they had them this year. If you ever want a v-hull or flat bottom boat, they sell off all of the abandoned boats at the end of each season. You can pick up a 16' v-hull for \$150.
