On Fri, 3/8 my crew did stocked trout residency electrofishing on West Valley Ck and then shot over to Valley Ck to recon. the "Didymo" report since they were in the area. As suspected from the photo, the biota were not Didymo (fortunately). We appreciated the report along with the photo, however, and were pleased that the individual who made the report was also concerned regarding not wanting to send us on a wild goose chase. He even offered to return to the stream to touch the material before having us come out.
