Arrived @ 10:45 & parked @ Rebers Bridge. Walked upstream about 150 yards and fished my way back to the bridge. Numerous #18 - #20 midges flying around and on the water. Nymphed with 5X a #16 Red Copper John and a small San Juan worm point fly. Fished to 12:00 and not a bump.

Left there and drove up to the Water Street area. Four cars there but nobody catching anything. I crossed and walked up stream about 300 yards and fished my way back still with the Copper John but put on a #20 silver BH midge pupa. Nothing. Went back to Rebers Bridge and walked upstream even higher and slowly nymphed my way back to the parking lot. Caught one 14" sucker on the black midge pupa and that was it.

Drove down to Paper Mill but two guys were in the riffle water below where the creek enters and four guys were fishing in the water upstream so I decided to cut my losses and left for home at 3:00.
