No one uses fingers to wrap hackle? :(

But of course. And for those of us that tie on a Renzetti, this is easy. 

It's easy to wrap hackle when you're using saddle feathers, but when you get down to the last bit of feather, hackle pliers are a good thing.

Wrapping a size 24 hackle feather from a cape is something I'd like to see you do without hackle pliers.

Kids.....sheesh.
