Pattern

Size, the one pictured is on a #16 beadhead hook, Orvis

Tail, pheasant tail.

Body, amber turkey biot. I coat thread base with head cement. Then wrap boit.

Thorax, peacock herl. Also wrapped over head cement.

Legs brown partridge.

Wing case brown scud back. Sometimes I use pearl flash over top.

Bead, copper tung.

Thread, light brown 8/0.

My goal was to do a PT which may hold up a bit longer. Seems to work. Fish seem to like it.

Thanks,

gencon
