Hit the creek yesterday with Aducker and Volkesnurse. Water was slow and clear but the day was beautiful. Saw some caddis on the surface and in the air (arnd 1PM) and by 2:30 – 3:00 BWO and midges could be seen but not many fish rising.

Had a decent amt of takes on a WB and PT and finally broke my VC cherry which just made a good day on the water with good people even better ... even if it was a long line release!

Excuse the non-expert report as I'm not up to speed on the complete FF lingo.
