Awesome flies!!

dumb question: Do you use softex over the body to preserve it? The reason I ask a few years ago I was told at a show that using body material like that wrapped around would or could dry rot if I didn't use something such as softex over the body to keep it from rotting. I did use it for a while but quit, I use my flies up way too fast to worry if they are going to rot or not. I only use it now if I want to have a build up over the body!
