I know this has probably been discussed a lot so just shut me up if I'm beating a dead horse here.....

What are some of your favorite go-to nymphs? I'm new to tying and looking to fill a box with proven nymph patterns. So far I have the GRHR, PT, Stonefly, prince nymph, copper John. I need one more fly to fill up my box of "attractor" nymphs. Any suggestions? I'll have another box for midges/larvae/etc.
