Wetnet, I like the Sunclouds because I have a wide face and they have a king model which fits me perfect. I can't tell you how hard it is sometimes for me to find a pair of glasses that are comfortable. I also found the polarized rose colored lens to be good in the sun and in overcast. O'yea, I do agree about them having a tendency to steam up but for me I can deal with that as long as they fit. Take care.
