Like most, I've worn felt-soled wading boots for decades. I switched to rubber w/studs about 3 years ago. Putting the evasive problem aside, I would never consider buying a pair of felts ever again. Overall, the rubber/stud boots perform much better than the felt-soled ones.

I agree. The rubber/stud boots do as good or better in the stream, and there is no comparison outside the stream. No more falling on my butt on a stream bank.
