Never had a problem tying to the hook bend. Fish don't seem to care, I don't have to learn a new knot, and seems the action on the 'bomb' fly is fine, I catch fish on the bomb and on the trailers.

Absolutely. However do you literally tie your tippet to the hook bend versus the eye? I am sure you don't.

Tippet to eye > either hook bend or hook eye to another fly yes.

Tippet to the "hook bend" obviously not.
